THE CHALLENGE

- High-resolution 4K spatial photography was causing conventional portfolio websites to choke and take 6+ seconds to load.
- Visitors on mobile devices experienced erratic layout shifts and unresponsive galleries.
- Lack of an intentional lead capture funnel resulted in lost client inquiries and poor qualification.

THE MOWGLAI SOLUTION

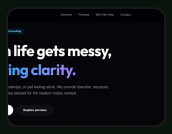

- Engineered responsive AVIF/WebP progressive image pipelines with blur-up placeholders for instant rendering.
- Designed a dark-luxe aesthetic matching high-end architectural digests with subtle tactile hover physics.
- Built an integrated consultation funnel qualifying visitors by project budget, location, and aesthetic preferences.
